EXPERIENCE

Full Stack Developer

May 2025 – August 2025

MLNOW Inc.

Toronto, ON

- Independently scaled a full-stack web application serving **70,000+ users**, achieving a **11x expansion** by utilizing EJS templates, ExpressJS, and the Google Cloud Platform
- Developed **RESTful development APIs** by integrating server-side logic and external APIs using ExpressJS, Google Cloud Datastore, and Cloud Storage, supporting faster delivery of programming content
- Created **personalized** learning materials by strategically leveraging artificial intelligence, achieving over 96% accuracy in content relevance and quality
- Collaborated with web designers to implement SEO-focused improvements, significantly enhancing the **user interface** while boosting web traffic by **over 45%**
- Integrated CRM, forms, and Google Analytics to build a unified marketing platform, enabling **automated data flows** and reducing manual reporting

EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Science, Honours

September 2024 – August 2028

- GPA: **3.83/4.0** (Cumulative average: 87.8%)
- 1 of 10 students** who are awarded an **\$18000** Mathematics Entrance National Scholarship
- Relevant coursework:** Data Structures and Algorithms, Linear Algebra, Imperative Languages, Version Control

PROJECTS

PyroBlog | [Live Demo](#) | [GitHub](#)

August 2025 – September 2025

- Developed a full-stack blog posting **web application** with **Next.js**, **React**, **TypeScript** and PostgreSQL (Neon), allowing users to create and share posts seamlessly
- Designed and optimized a **relational database schema** to store and query post and user information
- Implemented cloud storage and delivery using **Amazon S3 (AWS)**, enabling image integration in blog posts

Spotibine | [GitHub](#)

June 2024 – August 2024

- Created a full-stack **web application** with **Python** and Flask that enables users to create custom song combinations on Spotify
- Used the **Spotify Web API**, **OAuth2**, and **HTTP requests** library to control the user's music player
- Allows integration with all of the **100,000,000+** data points in the Spotify library

Optical | [GitHub](#)

September 2024 – November 2024

- Collaborated with a team to create a **full-stack** application that informs users how crowded a public space is
- Trained a **machine learning image recognition** program using **Python** with **PyTorch** that identifies humans with over **91% accuracy**
- Implemented UI/UX features on the front-end using **React Native**, **Typescript**, and **Node.js**

Chip-8 Emulator | [GitHub](#)

May 2024 – August 2024

- Developed an emulator using **C++** that can translate Chip-8, an interpreted language, in **real-time**
- Added customizability to the size of the display and the speed of the program (capable of over 500Hz)

ACHIEVEMENTS

Canadian Mathematical Olympiad Qualifier

March 2024

- Top 50 score** among **6,000+** of the strongest high school students at the Canadian Open Math Challenge

Canadian Computing Competition (Senior): Group II Honour Roll

February 2024

- Top 2% score** among **3,500+** of the most experienced Canadian youth competitive programmers

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, HTML/CSS, SQL (PostgreSQL), Bash

Frameworks & Technologies: Node.js, ExpressJS, Next.js, React, React Native, AWS (S3), Google Cloud (Datastore, Cloud Storage), EJS, Flask, Vercel, OpenAI API
